Taft Gets to Work on Annual Message and Investigators Resume Labors.

Washington, November 20.-The first signs of activity for the coming session of Congress made their appearance about the capitol and White House to-day. The House Committee on Banking and Currency met to plan a tion of the money trust investigation December 2. Members of the House Appropriations Committee began work on the annual supply bills for next year, and President Taft, cancelling all engagements for the next two days, arranged to begin to-morrow the writing of his annual mes to Congress.

It is understood the President will follow the plan adopted last year of dividing into separate messages his recommendations upon various subjects. The first message to be sent to Congress soon after it meets, probably will be general in character with particular attention given to the achievements of the year in relations with foreign countries. Subsequent messages will feal with financial affairs, antitrust and railroad legislation; the army and navy and the proposed establishment of a budget system for the estimating of Federal appropriations. Secretary Knox took over to the President to-day some State Department data on foreign relations.

The congressional money trust committee, after a conference in Chairman Pujo's rooms early in the day, determined to begin its hearings december 3. The committee will endeavor speedily to clear up that branch of the inquiry dealing with the operations of stock exchanges and clearing house exchanges, Without additional powers conferred by Congress, it was unable to complete the inquiry into the "concentration of money and credits."

An amendment to the banking law, which has passed the House and is now before the Senate, would give the comfollow the plan adopted last year of
